

# SRSD Online Professional Learning Model

For Teachers, Facilitators, and Administrators

Each pillar of the Scaling SRSD model offers unique benefits that contribute to a holistic and effective implementation strategy:

## Online Teacher Training:

- 8-hour self-paced online course
- Flexible scheduling, including late summer and/or during year PL time
- Rich resource of teaching tools and lesson plans

This pillar is designed for convenience and flexibility, making it ideal for educators with busy schedules. It offers an ongoing, resource-rich platform packed with teaching tools, unit plans, and lesson plans. This isn't just a one-time course but a continually valuable resource for evidence-based writing instruction integrated with social-emotional learning.

## In-School Facilitators:

- Trained ahead of teachers
- Serve as in-house coaches
- Coordinate additional trainings and connect to SRSD mentors
- Ensure year-to-year knowledge transfer for sustainability

In-school facilitators provide invaluable localized support and expertise. They act as liaisons between teachers and SRSD experts, ensuring quality and consistency. Facilitators are also key members of your school's SRSD implementation leadership team, providing a sustainable foundation for the program's long-term success.

### Practice-Based Implementation Support:

- Sessions with teachers and facilitators during unit implementation
- Direct support tailored to specific challenges and contexts
- Utilizes implementation data to inform ongoing professional learning

This pillar makes the professional learning model truly practice based. We offer online synchronous sessions directly focusing on problems of practice as teachers and facilitators implement each writing genre unit. This real-time, context-specific support is informed by their own implementation data, ensuring that the professional learning is as relevant and effective as possible.

### Unlimited Mentoring:

- Ongoing support from experienced SRSD mentors
- Customized to fit your curriculum
- Deep-dive trainings available for implementation refinement
- Continues into new semesters for training in additional genres

This pillar offers ongoing, tailored support from seasoned SRSD mentors. Teachers and facilitators benefit from in-depth, data-informed training that adapts to different school contexts and curricula. This approach ensures high-quality professional development and continuous improvement.

By integrating these four pillars, you're not just adopting professional learning program but investing in a comprehensive, adaptable, and sustainable model for elevating writing instruction.
